Exercise #3: Abstract Factory (in-class, 15 min)

- Download the pizza topping store example from Moodle
- Add an additional topping meat
  - Meat can be either ham, chicken or weisswurst
- Modify the pizza store to offer the new topping in addition to the old toppings
- Modify the topping factories to add the appropriate type of meat: Chicago pizza uses chicken, NY pizza uses ham
- Test the creation of pizza using the new topping with the test driver `PizzaTestDrive.java`
